

TEDDY MATHABATHA

Data Analyst | Excel (Advanced) • Power BI • SQL • Data Analysis & Trends • Presentations & Reporting

Johannesburg, Gauteng, South Africa | GitHub: <https://github.com/TeddyDataHub> | LinkedIn: <https://www.linkedin.com/in/teddy-mathabatha-3ba205223/>

Email: teddymathabatha3@gmail.com

Contact: 0722351747

PROFESSIONAL SUMMARY

Detail-oriented Self-taught Data Analyst with a strong quantitative foundation in Applied Mathematics and Statistics (UNISA) and proven ability to collect, analyse, and summarise data into clear, actionable recommendations. Skilled in building tables, graphs, and presentations that communicate trends effectively to both technical and non-technical stakeholders. Proficient in Advanced Excel and developing Power BI dashboards, with experience creating and maintaining production documentation and providing ad-hoc analytical support. Completed industry-recognised certifications in Data Analysis (Cisco) and AI & Data Science (Absa ReadytoWork). Brings strong written and verbal communication skills, advanced accuracy, and a conceptual analytical mindset to every engagement.

KEY SKILLS & COMPETENCIES

Data Collection & Analysis: Collecting, cleaning, transforming, and analysing structured datasets; identifying trends, outliers, and patterns to support decision-making.

Data Visualisation & Presentations: Building tables, graphs, charts, and PowerPoint presentations; translating complex data into clear visual outputs for stakeholders.

Excel & Reporting: Advanced Excel (Pivot Tables, VLOOKUP, Slicers, Dashboards, Charts); production reporting and management summaries.

Power BI: Building and maintaining interactive dashboards; in active development data modelling, DAX, Power Query.

SQL: Advanced querying, joins, aggregations, subqueries, data transformation and ad-hoc analytical support

Documentation: Creating and maintaining production documentation, data transformation logs, KPI definitions, and process records.

Stakeholder Management: Intermediate ad-hoc client and internal support, written and verbal communication, presenting findings clearly to non-technical audiences.

Analytical & Conceptual Ability: Strong problem-solving mindset, attention to detail, trend identification, and recommendation-led analytical outputs.

ANALYTICAL PROJECTS

End-to-End Data Analysis & Reporting Pharmacy OTC Sales | Personal [Project GitHub](#):

<https://github.com/TeddyDataHub>

- Collected and cleaned 2,000+ OTC pharmacy sales records across 5 regions standardising fields, removing duplicates, and handling null values to produce an accurate, analysis-ready dataset.
- Analysed data to identify and summarise key trends including peak sales periods, top-performing products, geographic revenue distribution, and salesperson performance translating findings into clear, actionable recommendations.
- Built tables, graphs, and an interactive Excel dashboard with Pivot Tables and Slicers providing stakeholders with a visual, decision-ready reporting tool for performance monitoring and trend analysis.
- Provided ad-hoc analytical support by querying the dataset in SQL to answer specific business questions around monthly trends, product rankings, and country-level revenue.
- Created and maintained production documentation covering all data collection steps, transformation logic, and dashboard update procedures ensuring reproducibility and audit-readiness.

Data Documentation & Source Mapping Exercise | Personal [Project GitHub](#):

<https://github.com/TeddyDataHub>

- Collected and catalogued 30+ data attributes from disparate sources, analysed data quality issues, and summarised findings with recommendations for remediation mirroring the ad-hoc internal support and documentation requirements of a data analyst role.
- Built structured documentation including data field definitions, transformation rules, and quality annotations maintained as living production documentation for downstream analytical use.
- Identified and summarised 4 categories of data quality trends (duplicates, date inconsistencies, missing values, field mismatches) and made recommendations to resolve each, improving overall data reliability.

Power BI Dashboard Development Active Development | Personal [Project GitHub](#):

<https://github.com/TeddyDataHub> | 2026 – Present

- Building Power BI dashboards to replicate and extend Excel-based reporting developing skills in data modelling, DAX measures, and Power Query transformations to create interactive, self-refreshing visual reports.
- Applying Power BI to visualise trend data, build summary tables, and produce graph-based outputs aligned to the reporting and presentation requirements of data analyst roles.

EDUCATION

BSc Applied Mathematics and Statistics | University of South Africa (UNISA) | In Progress

- Relevant coursework: Statistical analysis, mathematical modelling, quantitative methods, probability theory directly meeting the post-secondary degree requirement in Mathematics and Statistics.
- Strong numerical and analytical foundation applicable to data collection, trend analysis, recommendation development, and accurate reporting.

CERTIFICATIONS & CREDENTIALS

Data Analysis Essentials | Cisco [Networking Academy](#) | 2026

- Covered data collection, cleaning, trend analysis, and communicating findings through tables, graphs, and summaries — directly reinforcing the core responsibilities of this data analyst role.

ReadytoWork: Introduction to AI & Data Science | Absa [Group](#) | 2026

- Completed Absa's industry-aligned programme covering data science fundamentals, analytical thinking, and data-driven decision making within a business and financial services context.

SELF-DIRECTED LEARNING & DEVELOPMENT

- Actively developing Power BI proficiency (DAX, Power Query, data modelling) to build and maintain interactive dashboards and automated reporting pipelines.
- Independently developed Advanced Excel skills including Pivot Tables, VLOOKUP, Slicers, and dashboard design — applied directly across analytical projects.
- Building Python proficiency (pandas, NumPy) for data collection, transformation, and analysis workflows, supplementing SQL-based analytics.
- Maintains a public GitHub portfolio (<https://github.com/TeddyDataHub>) documenting data analysis projects, production documentation, and visualisation outputs.

This certificate is awarded to

Teddy Mathabatha

for successfully completing

Data Analytics Essentials

offered by Networking Academy
through the Cisco Networking Academy program.

A handwritten signature in black ink that reads "Lynn Bloomer".

Lynn Bloomer
Director
Cisco Networking Academy

18 Feb 2026
Completion Date

ReadytoWork

Certificate of Completion

This is to certify that

Teddy Mathabatha

has successfully completed the course

Introduction to AI and Data Science

Completion date

04/03/2026

A handwritten signature in black ink, appearing to read "Reaan Immelman".
