

Teddy Mathabatha

Data Analyst · Johannesburg, South Africa · teddymathabatha3@gmail.com · +27 72 235 1747

Profile

Detail-oriented data analyst with a quantitative foundation in Applied Mathematics & Statistics. I collect, clean, analyse and summarise data into clear, actionable recommendations using Excel, SQL, Power BI and Python — communicating findings to both technical and business stakeholders.

Education

BSc Applied Mathematics & Statistics — University of South Africa (UNISA), in progress
Coursework: statistical analysis, mathematical modelling, quantitative methods, probability theory.

Certifications

- Data Analysis Essentials — Cisco Networking Academy (2026)
- Introduction to AI & Data Science — Absa ReadytoWork (2026)

Technical Skills

Languages & Querying: SQL, Python (pandas, numpy, matplotlib), DAX

BI & Visualisation: Power BI, Tableau, Excel (Pivot, Power Query, Slicers)

Analytics: Trend & outlier detection, descriptive statistics, dashboarding, data quality assessment

Methods: Data cleaning, ETL, source mapping, documentation, stakeholder reporting

Selected Projects

Pharmacy OTC Sales — Reporting & Insights. Cleaned 2,000+ records across 5 regions; surfaced peak periods and top performers in an interactive Excel dashboard with SQL-backed analysis. Identified a 12% uplift opportunity in low-coverage regions.

Data Documentation & Source Mapping. Catalogued 30+ attributes across disparate sources; defined transformation rules and surfaced 4 categories of quality issues with remediation recommendations.

HIV Epidemiology Dashboard (Power BI). Modelled provincial prevalence and ART coverage indicators; built drill-through pages and DAX measures for year-over-year change.

Core Competencies

Conceptual & analytical thinking · Data storytelling · Stakeholder communication · Production documentation · Attention to detail
